DOCUMENTATION

**Human Exposure / Adverse Effect Incidents  
Involving Monsanto Agricultural Products**

Reporting Categories: H-A, H-B, H-C

Reporting Period: March 1, 2017 to March 31, 2017

<b>Substance:</b>	Roundup RTU Weed and Grass Killer Extended Control Plus Weed Preventer II from Monsanto
<b>Serial Number:</b>	32405827
<b>Date:</b>	03/27/2017
<b>Medical Outcome:</b>	Moderate Effect H-C
<b>EPA Reg. No.</b>	71995-47
<b>Active Ingredients:</b>	Glyphosate 1% Imazapic 0.017% Pelargonic acid 2%
<b>State:</b>	New York
<b>History and Notes:</b>	<p>Call transferred from consumer care, stating man has complaint of numbness and tingling after using Roundup Extended Control Ready to Use. Spoke directly to the man who states he used the product in Spring 2016. He was adjusting the nozzle of the wand when solution got on his left hand. He washed off with water (not soap). Several months after the exposure, he developed hand and elbow numbness/tingling. He has been going to a doctor because his symptoms have not improved. The MD is unable to explain the symptoms or treat. He states he can't sleep due to the symptoms. The man states he just saw an article on the news that Roundup will cause the hand to become numb. MRPC discussed the product toxicity. The symptoms do not correlate with the expected response to the product. Caller requesting a superior to call him back. Director of the MRPC called the man and confirmed the history of the exposure. He states he used the product in April 2016 and developed the symptoms, 2 months later, in June 2016. He did not put it together that the Roundup was causing his symptoms until he heard a story on the Channel 12 news about one week ago. He has been to his general practitioner who cannot find the cause of the symptoms. He says he is stuck in a hard place and may need to get a lawyer because no one is helping him. He is handicap and stays home most of the time. He does not routinely use chemicals or do much as he is 80 years old and was just using this as getting a sprayer ready for his wife to spray the weeds. Man would not have his MD contact the MRPC, but would speak with a physician if one would contact him.</p>
